Subject Index to Volume 35, 2000

Adaptive routing, 181
Algorithms, experimental testing, 91
Approximation algorithms, 248, 260, 279
Ascend/descend algorithms, 56
Asteroidal number, 26
AT-free graphs, 26

Branch-and-cut algorithm, 223
Broadcasting algorithm, 56
Butterfly graphs, 161

Capacitated Minimum Spanning Tree Problem, 1
Circuit routing, 40
Cluster fault-tolerant routing, 83
Cocomparability graphs, 26
Cographs, 195
Conjugate gradient, 91
Connectivity, 139
Core migration, 145
Core node, 145
Cycle extensions, 233
Cycle partition, 161

Dantzig's rule, 173
de Bruijn graph, 207
Decomposing algorithms, 40
Degree-preserving spanning tree problem, 26
Directed tree topology, 40
Distributed agreement, 266
Dynamic programming, 181, 195
Dynamic Slope Scaling Procedure, 216

Edge-Direction Assignment problem, 195
Edge-disjoint schedule, 40
Embedding, 56, 161

Failures, networks with, 181
Fault tolerance, 233
Fault-tolerant networks, 157
Fault-tolerant ring embedding, 161
Fault-tolerant routing, 83, 207
Fixed-Charge Network Flow Problem, 216
Functional networks, 70

(g, f)-factorization, 274
